The protection of data is important to us. In the context of our Internet offer, only the minimum data that is technically necessary for statistical purposes is gathered by us and is automatically stored in server log files. Such data includes type of browser and browser version, operating system used, search engines used, IP address of the accessing computer and the time of the server enquiry. This data cannot be used to identify individuals.

If and to the extent that the Internet site offers the possibility of entering personal or business data (e-mail addresses, names, postal addresses), these are provided by the user on an explicitly voluntary basis.
